

Army Message

*APPROVED SA and CSA

The U.S. Army is a highly trained professional land force, aligned with our National Security policies, capable of expeditionary, decisive landpower, tailored and scaled to perform missions across the entire range of military operations in response to an era of increased competition for resources, shifting alliances, empowered networks, unprecedented information access, and quickening devolutions of power.

Policy

The Army's force structure/end-strength, modernization and readiness is aligned with the National Defense Strategy providing the Joint Force with a smaller, leaner, and more agile force capable of providing expeditionary, decisive landpower for simultaneous operations in a continually evolving dynamic and uncertain security environment.

People

The Trusted Professionals, our Soldiers, are the strength of our Army and our Nation. Our competitive advantage in today's complex environment is our leadership development creating the most highly qualified, highly trained, adaptive, resilient, and trusted military professionals capable of shaping the environment, controlling the rate of operations and ensuring we are postured to fight and win.

Resources

Sustainable readiness is the foundation of capabilities within the Total Force. A long-term and predictable fiscal investment in the Army will allow the Army to achieve balance with our force structure/end strength, modernization and readiness providing the Nation a trained, ready, agile, and adaptive force prepared to achieve the National Security objectives in a complex world.

Prevent, Shape, Win Wars

The Army, as a part of joint, interorganizational, and multinational team, protects the homeland and engages regionally to prevent, shape, and win wars. A shared understanding, built on trust, improves our ability to prevent conflict; unity of effort allows us to shape the complexities of the security environment; and growing support across joint, interorganizational, and multinational teams best postures our Nation to win.
